Art Unit: 2655

In response to applicant's pre-amendment dated Nov. 08, 2004. The following action is taken:

The claims are rejected for the same reasons set forth in the previous office action mailed July 16, 2004 repeated herein.

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

Claims 1 and 10 are rejected under 35 U.S.C. 102(b) as being anticipated by JP 11-162003.

Independent claims 1 and 10 merely read on adding the I/V signals from the photo detection elements followed by attenuating the added signal. The limitation "attenuate" read on any element that alters the added signal such as an equalizer, differential amplifier, gain control...etc. The reference shows a signal processing unit for converting the signal from the photo detectors into voltages (I/V converters) fig 7, and a processing circuit 5 having elements 501, 502 and 504 in order to attenuate the summed signal from the added (RF signal) from the photo detection means.

Claims 9 and 11 are allowed.

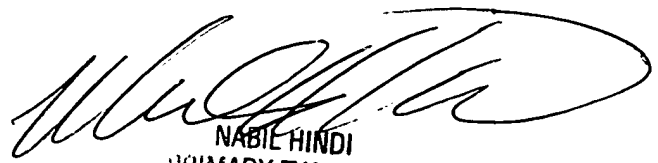

Art Unit: 2655

None of the cited prior art discloses the use of a complementary circuit element 20 in order to output an inverse signal to the added voltage signal from the photo detectors by performing a level shift of the added voltage signal.

Applicant's arguments filed Nov 08, 2004 have been fully considered but they are not persuasive. Applicant's arguments are centered around the prior art not showing the limitation "attenuate" but rather showing the use of an equalizer which does not function as an attenuator. The equalizer functionality is to raise and lower the signal frequency at a certain frequency. Thus it does attenuate the signal contrary to applicant's argument.

**THIS ACTION IS MADE FINAL.** Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire **THREE MONTHS** from the mailing date of this action. In the event a first reply is filed within **TWO MONTHS** of the mailing date of this final action and the advisory action is not mailed until after the end of the **THREE-MONTH** shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event, however, will the statutory period for reply expire later than **SIX MONTHS** from the mailing date of this final action.
